Air Distribution Cooling Vest

Provide upper body cooling for your worker to avoid heat stress. Potential temperature drop of 54 degrees requires 25 cfm at 80 psi air flow. Lightweight vest is constructed of Buna-N coated nylon with sewn-in air channels. Velcro® closures provide adjustable fit for all sizes. Complete system includes air distribution vest, personal air

conditioner vortex with temperature adjustment, 3/8" x 25' air supply hose and waist belt.
