Implications...

Marko Rodin has discovered the source of the non-decaying spin of the electron. Although scientists know that all electrons in the universe spin they have never discovered the source of this spin.

Rodin has discovered the underpinning geometry of the universe, the fabric of time itself. Marko has done this by reducing all higher mathematics (calculus, geometry, scalar math) to discrete-number mathematics. With the introduction of Vortex-Based Mathematics you will be able to see how energy is expressing itself mathematically. This math has no anomalies and shows the dimensional shape and function of the universe as being a toroid or donut-shaped black hole. This is the template for the universe and it is all within our base ten decimal system!

The physics, computer science and spirituality of Rodin’s pinnacle number conglomeration is staggering; it is universally applicable in mathematics, science, biology, medicine, genetics, astronomy, chemistry, physics and computer science. Rodin’s discovery will revolutionize computer hardware by creating a crucial gap space, or equi-potential major groove, in processors. This gap space generates underpinning nested vortices resulting in far higher efficiency with no heat build-up.

Rodin’s discovery replaces the binary code with a new code called the binary triplet which will revolutionize computer operating systems. It will transform physics and astrophysics by finally answering how black holes and pulsars work. Space travel will be revolutionized by reactionless drives that are unaffected by the weight they pull, making the present day combustion engine obsolete. The revolution brought on by reactionless drives will far surpass the societal changes wrought by the shift from steam engines to the present day combustion engine.

Rodin’s discovery can even be applied to ending pollution and food shortages by creating an inexhaustible, nonpolluting energy source. Because Rodin’s Vortex-Based Mathematics enables him to condense a trillion-fold calculation to only a few integer steps and because he is able to solve all the mathematical enigmas, Rodin’s mathematics will revolutionize computer information compression.

Rudimentary versions of the Rodin Coil, have been created...

such topics are completely groundless. In

This tour of anomalous research makes

and tested by leading scientist AI Henderson, president of Signature Antenna and were used by the U.S. Government in antennas that protect the four corners of the continental US increasing their range a thousand fold. Potentially life-saving medical devices based on crude approximations of the Rodin Coil are now being manufactured and used in the treatment of patients for a large range of maladies.

Mathematics as we know it today is

only a tool to symbolize quantities. Vortex-Based Mathematics (VBM) is completely different because it is a dynamic math that shows the relationships and thus the qual-

ities, substance and position in 3-D space of numbers rather than just the

quantities of numbers. Marko studied all the world’s great

religions. He decided to take The Most Great Name of Baha’u’llah (prophet of the Baha’i Faith) which is ‘Abdu and convert it into numbers. He did this in an effort to discover the precise mystical intonation of The Most Great Name of God. Since the Baha’i sacred scripture was originally written in Persian and Arabic, Marko used the Abjad numerical notation system for this letter to number translation. This was a sacred system of allocating a unique numerical value to each let-
ter of the 27 letters of the alphabet so that secret quantum mechanic phys-

ics could be encoded into words.

What Marko discovered was that

(a=1, b=2, b=5, a=1) = 9. The fact that The Most Great Name of God equaled 9 seemed very important to him as everything he had read in both the Baha’i scriptures and other religious text spoke of nine being the omnipotent number. So next he drew out a circle with nine on top and 1 through 8 going around the circle clockwise. Then he discov-
ered a very intriguing number system within this circle. Marko knew he had stumbled upon something very profound. This circle with its hidden number sequence was the “Symbol of Enlightenment.” This is the Mathematical Fingerprint Of God.

Follow along as the amazing prop-

certainties of this symbol unveil them-
selves to you. Put your pencil on number 1 and without picking up your pencil, move your pencil in a straight line to number 2, then 4,

then across the center to 8. Notice

that you are doubling. So next

should be 16 and it is, but 16 doubled is 32, but 3+2=5. So move your pencil to 5. Then 32 doubled is 64 and 6+4=10 and 1+0=1. And you’re back to 1. So move the pencil across the center and back up to 1. The significance of the Mayan calender is that 64 is one complete cycle of infinity. Then it begins again with 64 doubled is 128 and 1+2+8=11, then 1+1=2. And so on.

The Principal of Inversion

This principle is the foundation of creation and symmetry. You can’t have symmetry without inversion. The Family Number Groups are 180 degrees opposite each other. The number 6 is 180 degrees opposite 12 which illustrates that the half-way point is the longest most extreme distance away from itself.

The number is on the left, horizontal addition result is on the right.

Notice how the 1,2,4,8,7,5 pattern indefinitely repeats.

ExtrOrdinary Science & Technology - JAN/FEB/MAR 2010
You will never get off this track as you keep doubling. Notice the infinity symbol has formed underneath your pencil, creating an ever-repeating pattern of 1, 2, 4, 8, 7, 5. Amazingly, this number sequence stays intact as you half it as well. Start again at the 1 but this time go backwards on the infinity symbol that is formed by your pencil to the 5. Then half of .5 is .25, and 2 x .25 = .5. So move your pencil to the 7. And half of .25 is .125 and 1 x .125 = .125. So move to the 9. And half of .125 is .0625 and 6 x .0625 = .375 and 3 x .375 = .125. So go across to the 4. And half of .0625 is .03125 and 3 x .03125 = .125 and 1 x .125 = .125. So move to the 2. Forever staying on the route of 1, 2, 4, 8, 7, 5 even backwards.

At this point some of you might be thinking, “What in the world do these number patterns have to do with real world applications?” These number groupings piece together with the 9 as the center. In fact, the Yin Yang is not a duality but rather a triunity. This is because the 3 and 6 represent each side of the Yin Yang and the 9 is the “S” curve between them. Everything is balanced on threes. We think that the universe is based upon dualities because we see the effects and not the cause. When I say the oscillation between the 3 and 6 what I mean is that 3 doubled is 6 and double 6 is 12, but 1 + 2 = 3, and then 12 doubled is 24, but 2 + 4 = 6 and 24 doubled is 48, but 4 + 8 = 12 and 12 doubled is 24. So 3 and 6 go back and forth in their own separate dimension. This creates the other important pattern of (3, 9, 6, 9, 3, 9, 6). Now lay out the number patterns on the 2-D grid. Place the 3, 9, 6, 9, 3, 9, 6 number pattern in the center of the 1, 2, 4, 8, 7, 5 number pattern going forward and the 1, 2, 4, 8, 7, 5 number pattern going backwards this continuation creates an amazing perfect number map.

The Mathematical Finger Print Of God is a legend or blueprint for the universe. The 9 demonstrates the Omnidentic dimension which is the higher dimensional magnetic field lines. The last number left to be explained is the number 9. The number nine is Energy being manifested in a single moment of occurrence in our physical world of creation. It is unique because it is the focal center by being the only number identifying with the vertical upright axis. It is the singularity or the Primal Point of Unity. The number nine never changes and is linear. For example take all multiples of 9 equal 9. 9x1=9, 9x2=18, but 1+8=9, 9x3=27, but 2+7=9. This is because it is emanating in a straight line from the center of mass out of the nucleus of every atom, and from out of the singularity of a black hole. It is complete, revealing perfection, and has no parity because it always equals itself. The number nine is the missing particle in the universe known as Dark Matter.

The number nine lines up with the center of the infinity symbol and it is from this center that the linear emanations we call Spirit emanate from the center of mass outwards. Spirit is the only thing in the universe that moves in a straight line while causing all matter to precess and warp. As physics’ pariahs: There are nine simple multiplication series (one series for each discrete number 1-9) in Vortex-Based Mathematics. These multiplication series are based upon reducing all products to single digit via horizontal addition forming meaningful number sequences. Nature is expressing herself with numbers. The symmetry of our decimal system is a principle of nature. The 9 axis causes the doubling circuit and it is the point towards which matter converges and away from which it diverges or expands. Thus the polar number pairs will be mirror images of each other, both flowing in opposite directions from the central axis. There is perfect symmetry wrapped around a single point coiling onwards the way that petals are wrapped in a rose, or a

Decaying spin of the electron. Numbers have temporal, spatial and volumetric qualities. For example, physics is the base ten number system. In other words numbers have bilateral or mirror symmetry and line up in stratified layers of horizontal planes. This is the same as physics’ pariahs: There are nine simple multiplication series (one series for each discrete number 1-9) in Vortex-Based Mathematics. These multiplication series are based upon reducing all products to single digit via horizontal addition forming meaningful number sequences. Nature is expressing herself with numbers. Rodin Coil tests have determined a
1000% greater magnetic output than
the present day standard wound
electrical coils.

Rodin’s mathematics enables Marko
Rodin to design circuitry for com-
puter microprocessors that have no
waste heat and - thus, require no re-
frigeration or heat sink - eliminating
all friction, resistance and parasites.
This is possible because:

1) Rodin knows the natural pathway

that electricity wants to take without forcing it, scientifically
known as the longest mean free
pathway of least resistance;

2) Rodin has discovered the source

of the non-decaying spin of the
electron;

3) Rodin uses electricity’s own

magnetic field to bath the conduc-
tors in a magnetic wind to main-
tain constant temperature with-
out any risk of short-circuiting or
incinerating conductors.

State of the art manufacturers of
conventional processors have no
idea how to prevent heat buildup.
Rodin knows how to incorporate,

in the conductors, a crucial gap
space that creates underpinning
nested vortices that are respon-
sible for super-efficiency. (Refer
to illustration on page 13) One of
Rodin’s great abilities is to create
microprocessor electrical circuitry
in which the conductors touch, yet
do not short-circuit. He is able to
do this as a result of what he calls har-
monic shear which creates a natural
wall of insulation without requiring
any special materials. This natural
electrical insulating shear is created
by the harmonic phasing activation
sequence of the electricity.

Not only does Rodin’s discovery
introduce a new type of processor
for computers, its application also
enables Rodin to create a new arti-

ticial intelligence operating system

that replaces the binary code with
a new code Rodin calls the binary
triplet. Former Microsoft senior re-

searcher, Russell P. Blake, treats the
binary triplet briefly in his article,
“The Mathematical Formulation of

the Rodin Torus”, in which he states
that the Rodin Torus has perfect
mathematical coherence on all six
axes and is not only three dimen-

sional, but actually higher Omni
fourth dimensional, and higher.

Marko Rodin is able to navigate on
all axes of a Rodin Coil Torus, thus

resolving the obstacles to creating
artificial intelligence by being able
to compute multi-dimensionally.

Rodin also adds a new factor of po-
larity to the binary code by using his
binary triplet code which is based
on the fact that all numbers begin
and end from out of a point. Rodin’s
toroid number map depicts the ac-
curate pathway through the event
horizon of a black hole and into
the Singularity vortex-well, where
it inverts. No mathematics, other
than Rodin’s can calculate while
inverting, since all existing branches
of mathematics self-destruct before
emerging out of the other side in
a white hole.

Rodin’s math harnesses a heretofore

unavailable level of mathematical
language that takes advantage of
six different self-referencing axis
configurations over the surface to-
pology of the Rodin Coils toroidal
matrix, that enabling the creation
of new revolutionary advances in
artificial intelligence hardware and
software.

Using his Vortex-Based Mathemat-
ics, Marko Rodin is able to show
that numbers are real and that nature

expresses herself through numbers.

He solves the long standing debate
in mathematics — whether num-
bers are a man-made contrivance
or based in nature — by proving
that numbers are a condition of
creation. With this math, Rodin is

[Image 849x306 to 1023x626]

“Numbers are REAL and

able to demonstrate the man-made mistakes in mathematical theories and arrive at a correct solution. He is also able to predict any missing unknown prime number and to show that symmetry exists in all prime numbers. Base ten comes from the first true prime number 3 squared which generates the modulo nine toroid number map. Base twenty six comes from the prime number 5 squared which generates the modulo twenty five toroid number map. Any base counting system is always one number less because of the missing zero. Base ten is correctly referred to as modulo 9 and base twenty six modulo 25. Only prime numbers can generate true base counting systems comprised of circuits and thus base twelve or base fifteen are false counting systems that result in broken symmetry calculations.

Zero is not a number and does not exist before one on a number line. Rather Zero is an absence.

In Rodin’s Vortex-Based Mathematics, zero does not exist, but is replaced by the number 9 and instead, zero does not exist, but is referred to as modulo 9 and base counting system is always one number less because of the missing zero. Thus base ten is correctly referred to as modulo 9 and base twenty six modulo 25. Only prime numbers can generate true base counting systems comprised of circuits and thus base twelve or base fifteen are false counting systems that result in broken symmetry calculations.

“Every black hole is connected to a white hole.”

A newly discovered emanation which is above the known elements he is able to create electricity without reductance or friction, which he refers to as synchronized electricity. This synchronized electricity can be observed in its past, present and future position using Rodin’s numerical interferometry patterns, which are noninvasive and hence, eliminate the possibility of the Heisenberg Uncertainty Principle occurring. The only way scientists can model an atom is to observe it, invisibly, through an electron microscope, but this causes the electrons to absorb the light and jump a valance ring and you’ve just deflected and contaminated it. With Rodin’s mathematical matrix an electron is observed not with light, but by creating an interferometry numerical diffraction grating pattern. Thus, nothing is contaminated. Hence, Rodin is capable of determining the electron moment in all frames of reference. This enables him to “see” infinitely small or large, from the quantum level to the shape of galaxies and the universe.

Astrophysics

Rodin’s Vortex Based Mathematics Coil explains the secret of creation. It explains how the universe re-processes matter, uses matter as its coolant source to bathe itself at the core of a black hole and then to dissipate heat away from the center of the galaxy. And every galaxy in the universe, it turns out, is in the shape of a torus.

Spirit Energy Emanations of a Rodin Coil

Rodin’s toroid number map also explains how black holes work. A black hole is a negative vortex where everything implodes... swirles and compressed until it reaches the inner diameter of the toroid, which is called the singularity. Spirit emanates Omni directionally from this toroidal pinch. Matter is drawn in at the top and ejected at the bottom. This is the source of gravity, of all motion, and of time. It is what causes everything to warp and spin. When the old, dead stars and planets are shot out of the white hole (every black hole is connected to a white hole), they are made up of hot streaming interstellar nebula gaseous matter. As this stream gets further away from the toroidal pinch point it cools and amalgamates, forming new stars and planets all over again. This is why our human bodies are made of stardust ... we are formed from countless stars of the past. This is an endless cycle of renewal.

The Rodin Coil harnesses this energy by tapping into a self-contained energy source that is renewable anywhere. The creation of a reactionless drive, called a flux thruster, atom pulsar becomes possible. A flux thruster would enable humans to travel anywhere in the universe without having to return to Earth for fuel or living supplies. Technology could be taken to any planet and could make an entire planet. Rodin’s mathematical matrix provides the secret of molecular engineering. One could go to a dead, barren planet and transform it into an oasis.

In this online video, a 1-inch diameter, 64-gram magnet sphere Neo N42 is spun at approximately 2000 RPM & suspended verifying magnetic field generation, with less than 4-Volts, at 20,000-Hz using 90-feet of 24-gauge magnet wire on a 5-inch diameter hollow air core toroid drawing 1.5-Amp while consuming less than 6-Watts. DNA and Microbiology
How precious are your eyes and the priceless gift of sight? Do you really believe that your vision evolved from the random hap hazard trial and error of evolution? Chance alone is not possible to make up the secrets contained within your DNA. Then where is preserved this missing and hidden information? DNA is not comprised of two helices but from three with the third helix being invisible and occupying a displacement space called the Major Groove which is located in between the two helical strands. Nature abhors a vacuum. This Major Groove is not empty but instead is where all information for the genetic coding of life exists. Rodin’s Vortex Based Mathematics is the schematic for life revealing that inside the Major Groove of DNA exists a higher dimensional Bioaetheric Template (Morphogenetic Field) defined by the mathematical number pattern 3, 9, 6, 9, 3 revealing the existence of an All Coherent higher intelligence guiding evolution. Selective splicing of novel DNA sequence combinations are able to be performed at will for medical treatment and the elimination of all diseases by utilizing these higher dimensional Flux Fields to control DNA cleavage and receptor sites.

Maxwell previously stated that there must needs to exist a Monopole to symmetrize all of his electrical equations. Rodin’s math is a blueprint that gives us the ability to observe this missing Monopole in the form of an Inertia Aether Flux represented by the number 9 and it’s associated Magnetic Field represented by the numbers 3 & 6 which are perfectly nested in unison within the Major Groove of DNA.
The backbone of DNA's double spiral helix is comprised of phosphates and phosphates are known to always have a negative electric charge and obviously with any negative electric charge there is always going to be an associated magnetic field.

**Transformers, Motors and Energy-Efficient Power**

A motor based on the Rodin Coil is far more efficient than a conventional electric motor. The Rodin Coil produces so much more magnetism that a minimum 90% reduction in copper can be achieved, translating into tremendous weight reduction and savings in material. Rodin has a team capable of producing super-efficient motors with much lower power consumption than conventional motors. These motors could be incorporated into a product as small as a ceiling fan or as large as a power plant. An existing prototype of a ceiling fan presently tests 600% more efficient than a box fan. There will be live demonstrations of the newest Rodin Coil motor design technology at this upcoming 2010 TeslaTech ExtraOrdinary Technology Conference.

There is considerable loss of energy in conventional electric light bulbs since they produce waste heat. For example, the standard Edison bulb has 90% loss of energy. Only 10% of the energy produced is converted into light. Using a Rodin Coil to energize florescent and led lights, there has been a doubling increase in efficiency due to the Rodin Coil's ability to be far more efficient than any device presently existing.

**Communications**

Rodin-Coil antennas will radically change communications. They can receive and transmit through any media, penetrating what even magnets cannot penetrate, with a sensitivity heretofore considered impossible. Col Thomas Bearden published that testing by engineers has already shown that Rodin Coil design is more sensitive than any antenna in existence.

- **Microscopic Underpinning Nested Vortices**
  - Every continuous medium has the inherent capability to be superconductive based upon harmonic cascade. Examples of continuous mediums, in the form of a toroidal matrix, are tornados, hurricanes, water spouts, solar systems, galaxies, black holes/white holes and maelstroms.
  - Underpinning nested vortices are a scalable micro to macro fractal. The area of microscopic underpinning nested vortices needs considerable further research as it applies to biology and genetics, motors, power generation and propulsion systems.

- **3-D Audiophile Speaker Technology**
  - Any frequency range or tone input into a Rodin Coil can be reproduced without the use of a diaphragm. Thus is a radically new type of speaker and reproduces the sound directly from the Rodin Coils itself eliminating the need for a diaphragm.

- **Biophysical Harmonics**
  - Biophysical harmonics, which is the same as neurogenesis, is the secret of how to repair or regenerate areas of the brain damaged through injury or disease. In 2005, medical researchers were able to achieve regeneration of mammal organs, bones and tissue, but not of brain tissue. In his early research, Marko Rodin began exploring how sound effects the human brain, and using the Biophysical Harmonics to treat autism and brain damage.

  The foundation of understanding the human brain’s neuro synaptic connections resides in the mathematical patterns Rodin uses to reveal how the brain learns and rewrites itself.

- **New Design of Thermal Nuclear Fusion Reactors**
  - Toroidal Fusion Research is the Most Expensive International Scientific Project in History. Existing technology for thermal nuclear fusion reactors uses a band aid approach. Electricity is manipulated and forced into pathways it doesn’t want to take by using cryogenics and correcting...
magnets because no one knows electricity’s natural pathways. However, Rodin does. He creates toroidal pinch by utilizing mirror symmetry Rodin Coils to create radical new designs that eliminate all the peripheral equipment currently used. He is capable of achieving the same results for a negligible investment.

VBM Dual Non Cartesian Coordinate Axes

The dual XYZ non cartesian coordinate system creates the toroid map.

Intelligent Design is True.
- Atheism is false.
- Darwin’s evolution is false.
- Creationism that violates the laws of physics is false.
- Scientists never intended to disprove the existence of God.

- There is an invisible Hand guiding creation.
- Absolutes do exist and Fixed Constants are real.
- The Universe has a Preferred Frame of reference and numbers have an inherent Spatial Orientation.
- There is a Divine Touchstone for everything.
